Problem with your 1998 Audi A4? Our list of 14 known complaints reported by owners can help you fix your 1998 Audi A4.

1998 Audi A4 Problems and Complaints - 14 Issues
1998 Audi A4 Quattro V6 30V (AHA engine) I am told after shutting off the engine, smoke was seen coming out from under the hood, but I wasn't there and my wife of course refused to open the hood so I could get a clue as to where it was coming from. The car did not overheat, oil and coolant levels are fine, all instrument cluster dials were reading normal.

Suddenly car is shaking and blinking check engine light
If the IAT is reading excessively high, check the IAT connector for damage. If you find none, unplug the IAT sensor and recheck the reading. It should now read the minimum, around -20 deg. If it does, then replace the IAT sensor. But, if the reading is still high, unplug the sensor and check for resistance across the two wiring harness terminals.

1998 Audi A4 Coolant Temperature Sensor | Advance Auto Parts
"Lola" was a 1998.5 (as Audi always introduces models in the half-year cycle) A4 2.8 V6 with quattro and a 5-speed manual. The blue paint and khaki interior with matching blue piping on the seats really set off the beautifully proportioned car, despite numerous rock chips from several Colorado winters.

Capsule Review: 1998 Audi A4 (B5) - The Truth About Cars
The temperature sensor is located directly to the right of your valve cover as you can see in the picture. If you have an Audi A4 or passat it is located between the firewall and valve cover in front of the battery enclosure. You can choose to remove your engine cover if you'd like but you should have enough room with out removing it.
