Get this from a library! A formulary of detergents and other cleaning agents. [Michael Ash; Irene Ash]

A formulary of detergents and other cleaning agents (Book ...

The chemistry of making a detergent or cleaning product (as described in the Modules) will enable you to get started with professionally constructed formulations - like you are the chemist. You weigh and measure your ingredients, mix them together in the order given, heat and cool as may be required.

Formulations - How to Make Detergent

Chemical formularies are found in many industries including pharmaceuticals, cosmetics, foods, textiles, pesticides, detergents, perfumes, and more. The chemistry of perfumes has been studied for hundreds of years and what began as mostly flower extract has evolved into an advanced science and successful industry.

FORMULATION DATA BASE CONTROL LIST

A Laundry detergent composition is a formulated mixture of raw materials that can be classified into differ ent types based on their properties and function in the final pr oduct.

(PDF) Laundry Detergents: An Overview

1/2 teaspoon liquid starch or liquid detergent per container LET'S FORMULATE: Slowly add the flour to the water - stir continuously until mixed. Heat gently and stir until thick. Allow to cool. Divide the mixture into 5 portions. Add 2 tablespoons of water and 3 tablespoons of powdered paint to each portion and stir. (Add more water if too ...

Understand

Detergents, as we have learned so far, consist of surfactants and chelating agents. Remember, surfactants remove dirt from a soiled surface and chelating agents are used to surround unwanted metal ions found in cleaning solutions. The chelating process, though very effective, is not always necessary and adds to the cost of formulating detergents.

The Chemistry of Cleaning - Essential Industries

Detergent surfactants are made from a variety of petrochemicals (derived from petroleum) and/or oleo chemicals (derived from fats and oils). Role: Multiple roles including- Cleaning (soil removal), Foaming, Wetting agent, Antiredeposition agent, Dispersing agent.
