Honda B-Series: Engine Basics and Specs There are two major branches of the B-Series engines. There are the ones many enthusiasts are familiar with (B16, B17, B18, B20B) and then there are the oddball engines that really shouldn't have the B in their name (B20A and B21A).

### Honda B-Series: Everything You Want to Know | Specs and ...

Unfortunately for Honda, this hasn't just been an isolated incident for one or two drivers. In fact, in 2019 Honda issued an extended warranty to cover problems with their turbo engines in CR-V models and Civic models. The extended warranty covered over 1 million vehicles thanks to a problem that caused gasoline to mix with the engine oil.

### Did Honda Fix Their Turbo Engine Problems 2019? Find Out ...

General-purpose engines. Current Honda general-purpose engines are air-cooled 4-stroke gasoline engines but 2-stroke, Diesel, water-cooled engines were also manufactured in the past. The current engine range provide from 1 to 22 hp (0.7 to 16.5 kW). More than 5 million general-purpose engines were manufactured by Honda in 2009.

### List of Honda engines - Wikipedia

Honda B series engines were produced up until 2001 and didn't change much over the years. And were found in the Honda CRX Civic and Integra. For class 11 rallying we tend to use the B16A and B16B(Type R) engines. These engines are a great base for power and reliability even in standard form.
