RC Model Jets - Model Aircraft Company

A true turbine rc model jet engine adds the ultimate touch of realism to a radio controlled jet, and commercially produced units for rc use are now widely available - if not always affordable! Turbine rc jet flying has become a big thing in recent years and there are some spectacular models around, large and small, but this aspect of the hobby is not for the novice.

How An RC Model Jet Engine (Turbine) Works

Electric Ducted Fan (EDF) RC jets. The E-flite F-16 EDF jet shown above is a nice example of electric powered jets widely available today.. This kind of jet is the best introduction to flying true rc jets (i.e. with no propeller).They use an electric ducted fan unit as pictured below.. A couple of typical EDF units for jets

Sizing Electric Power Systems For Model Aircraft

"Despite its simplicity and ease of construction (the complete model is made from 1/16" sheet balsa), the Supersonic Wing is a high-performance craft. And for those modelers who may consider the Jetex 50 a low-powered jet engine capable of little more than a polite hiss, I'd like to advise that a light model properly trimmed for flight will lead you a merry chase over hill and dale.

Jetex.org - Model Aircraft Plans for the Jetex 50

Blink and you'll miss it. German airplane pilot Niels Herbrich has officially broken the record for the Fastest remote-controlled jet-powered model aircraft (RC), after his handiwork achieved an incredible speed of 749.221 km/h (465.544 mph).. The 47-year-old, along with fellow enthusiasts Christoph Meier and Tunc Uzun, designed and built a bright pink model plane that is equipped with a ...

WORLDS LARGEST RC CONCORDE JET MODEL - 149KG 10 METERS ...

In 1995 I've seen for the first time a flying model airplane powered by a micro gas turbine. It was a slightly modified Puma with the turbine mounted on top of the plane. The turbine was home made by my club fellow Theo Walravens. Theo is further developing his own turbines and also shows them flying as you see on the pictures.

Jet Powered Models Turbines

German airline captain, Niels Herbrich, designed and built the world's fastest remote-controlled jet-powered model airplane. Equipped with a Behotec 180 turbine jet engine, the RC beast reaches insane speeds of up to 451 MPH. RC MEDIA WORLD posted footage (part 1 and 2) of Herbrich somehow keeping sight of and controlling his RC plane during a world record flight training session in August.

The World's Fastest RC Jet-Powered Model Airplane Reaches ...

Hi Anton I wanted to congratulate you again on a great model. I recently did the maiden of my SU-30 and it fly's incredible. It is a very fun jet to fly specially when you activate the vector thrust. Thanks again on a great model!!! Michel Durand JetsRC
