Lab 6 5 Weather Patterns Answer Key - cradle-productions.be

After completing this Lab, you should be able to: compare climate patterns from a variety of regions of the globe and explain how climate is defined by precipitation and temperature; and give examples of the relationship between climate and the living environment (the biome).

Lab 4: Climate Patterns and Life

The Weather Lab is designed to help elementary and middle school students learn about weather patterns. In the Weather Lab students select an ocean current and an air mass then try to predict the weather pattern that will result from their choices. The Weather Lab provides an overview of the characteristics of each air mass and ocean current.
