Diagnosis

the retinal and vitreous diseases, including papilledema, central serous chorioretinopathy, retinopathy of prematurity, and pars plana vitrectomy. Papilledema is swelling of the optic nerve specifically due to elevated intracranial pressure that causes a reduction in the ability of fluid to exit the eye.

Examination And Diagnosis testing - Mayo Clinic

An eye exam involves a series of tests to evaluate your vision and check for eye diseases. Your eye doctor may use a variety of instruments, shine bright lights directly at your eyes and request that you look through an array of lenses. Each test during an eye exam evaluates a different aspect of your vision or eye health.
