That's why many people associate the accumulation of wealth with the accumulation of power – the more money you have, the more powerful you are. And when people have a low sense of their personal power, they have an overwhelming urge to amass large sums of money quite out of proportion to their needs.

For space explorers hovering in the cold, airless regions beyond our atmosphere, power (or the lack thereof) is a matter of life and death. Thanks to our sun, however, solar power is readily available. Solar technologies generate a majority of the power used during space missions, keeping life support and other vital spacecraft systems working. Solar power is so critical that NASA spends considerable time and money to make solar panels must more efficient, lightweight and affordable.
