The Color Factor The Economics

The Color Factor: The Economics of African-American Well-Being in the Nineteenth-Century South demonstrates that the emergent twenty-first-century recognition of race mixing and the relative advantages of light-skinned, mixed-race people represent a re-emergence of one salient feature of race in America that dates to its founding. Economist Howard Bodenhorn presents the first full-length study of the ways in which skin color intersected with policy, society, and economy in the nineteenth ...

Carat, cut, clarity, and color are the four Cs that determine a diamond's value. The fifth C, "conflict free," is important to many buyers today.

The Four Cs of Buying Diamonds: Definition

Economists' appetite produced other colour economies derived basically from environment-related studies and activities. The brown economy basically refers to the industries which cause high levels of pollution and gas emissions. Such industries are cement, iron smelting, quarrying and coal mining and coal-using production facilities.
